

$$0.8 < |f_{3n}/f_3| < 1.7 \quad \dots(5)$$

$$v_{3n} < 40 \quad \dots(6)$$

$$1.7 < N_{3n} \quad \dots(7)--$$

From page 17, lines 6 to page 18, line 5, please replace the entire paragraph with the following:

-(A-13) The second unit preferably has a cemented lens formed by cementing a positive lens to a negative lens and a positive lens in a biconvex shape and satisfies

the following conditional expressions:

$$0.7 < R_b/R_a < 1.2 \quad \dots(2)$$

$$-0.6 < (R_d + R_c)/(R_d - R_c) < 0.6 \quad \dots(3)$$

$$0.3 < d/f_w < 0.5 \quad \dots(4)$$

$$0.8 < |f_{3n}/f_3| < 1.7 \quad \dots(5)$$

$$v_{3n} < 40 \quad \dots(6)$$

$$1.7 < N_{3n} \quad \dots(7)$$

where R_a is the radius of curvature of the lens surface of the cemented lens of the second unit which is nearest to the object side, R_b is the radius of curvature of the lens surface of the second unit which is nearest to the image side, R_c is the radius of curvature of the lens surface of the positive lens in the biconvex shape which is located on the object side, R_d is the radius of curvature of the lens surface of the positive lens which is located on the image side, d is the thickness of the cemented lens of the second unit, f_w is the focal length of the overall system at the wide angle end, f_{3n} is the focal length of the negative lens of the cemented lens of the third
